

PowerPulse.Net

Daily News for the Global Power Electronics Engineering Community

2019 Media Guide

Introducing the All New **Design Center**

About Us

PowerPulse is published by Opportunity Media Inc., and is the leading source for practical design information and the latest technology and industry developments covering all aspects of power electronics.

PowerPulse delivers the industry's only daily news service via PowerPulseDaily emails to **over 50,000 subscribers**; delivering over 1 million email updates monthly to subscribers.

PowerPulse specializes in identifying market and sales opportunities for advertisers through a customized mix of driving lead generation, increasing brand awareness and share of mind, and delivering click-thrus to advertiser websites.

PowerPulse has been connecting power system engineers with the latest solutions and advertisers with power system engineers for over 20 years.

PowerPulse reaches the readers who matter. In a recent survey, **73%** indicated that they "**Manage or Influence**" purchases of power management and power conversion products, and **76%** indicated that they **had taken action** after seeing an ad on PowerPulse and "visited an advertiser web site." When asked about their "primary job function," **67%** of PowerPulse readers responded that they are involved in some phase of **engineering** activities, **22%** are in various **executive management** positions, and **11%** cited "other involvement" with power electronics.

Not only does PowerPulseDaily have over 50,000 requested daily email subscriptions, almost 20% of PowerPulse readers visit the web site on a daily basis and an astounding 70% visit weekly or more often.

"PowerPulse readers are looking for new product and technology solutions for the design challenges they face in their daily professional activities. And our Daily coverage gives PowerPulse readers the fastest-access possible to the latest developments in power electronics," stated Jeff Shepard, Editor.

"In publishing in general, 'content is king.' On the Internet, 'News Content is King,' and PowerPulse.Net delivers far more news coverage than any other source," Shepard continued. "Our comprehensive global coverage of highly-relevant and leading-edge product, technology and industry news is what drives our remarkable reader loyalty for PowerPulseDaily email news service and enables PowerPulse.net to consistently deliver over eight-million monthly ad impressions," he concluded.

Lead Generation

Webinars include:

- Rehearsal(s) with PowerPulse staff to ensure the event runs smoothly
- 5 e-blasts to our full list to promote the webinar
- 2 months ads on PowerPulse.Net to promote webinar
- Listed exclusively in Feature section of PowerPulseDaily for at least 1 week
- Listed in Power Spotlight section of PowerPulse.Net
- Event registration (sponsor logo included on reg page)
- On Demand viewing and monthly named sales prospect lead reports for 6 months after LIVE event
- Plus more ads in PowerPulseDaily (upon availability)

White Papers include:

- 2 monthly e-blasts to our full list that promotes all current PowerSpotlights
- Listed in the Power Spotlight section of PowerPulse.Net (including sponsor logo)
- Listed exclusively in Feature section of PowerPulseDaily for at least a week that is sent to our 50K subscribers
- 6 months of named sales prospect leads per white paper sent to the sponsor on a monthly basis
- Sponsor logo linked to sponsor website

Lead Generation

Sponsored Content

Raise brand awareness. Educate the marketplace. Achieve measurable results. Produce a bigger list of named sales prospect contacts!

Sponsored Content has emerged more prominently in the last few years as a way for marketers to engage with customers on a new level—a way to connect with a built-in audience by providing quality content that could already be there, making it feel like a native or natural experience.

LIVE Sponsored Webinars

As far as customer acquisition channels go, webinars are one of the most effective ways of speaking directly to your potential customers. Every effort to generate an audience for your webinar is an opportunity to promote your brand. With a PowerPulse campaign, you get more than just sales leads -- you get multiple opportunities to build brand awareness and remind prospects about your product over a period of months.

Webinar content can include, but is not limited to, direct promotion and training of your products with registered leads delivered monthly for six months per webinar. PowerPulse webinars should be designed to appeal to the technical engineering community of the global power electronics industry. The publisher retains right to disapprove inappropriate webinars.

Webinar production includes at least one rehearsal with the staff of Opportunity Media to ensure a smooth event. Opportunity Media provides the automated registration system and gathers the registration information as defined by the webinar sponsor. Registration information is sent to sponsors on a monthly basis.

Webinar promotion includes an ad on PowerPulse.Net for two months, one month prior to the event and one month following the event and (as available) in PowerPulseDaily. Plus a series of at least five e-blasts to the entire list of PowerPulse subscribers. Webinars are also listed on the Power Spotlight page.

Sponsored White Papers

White paper content may include promotion of app notes, technology introductions, etc. with registered leads delivered monthly for six months per white paper. White papers posted on PowerPulse should be designed to appeal to the technical engineering community of the global power electronics industry. The publisher retains right to disapprove inappropriate white papers.

Opportunity Media provides the automated registration system and gathers the registration information. Registration information is sent to sponsors on a monthly basis.

White paper promotion includes two monthly e-blasts that promotes all current PowerSpotlights, and white papers are presented in the Power Spotlight section of PowerPulse.Net. And the most-recently posted white paper(s) are included in the Featured section of PowerPulseDaily for at least one week.

PowerPulse.Net offers a variety of ad formats, from standard leaderboards and inline rectangles to the new XL half-page "pinned" display ads. The half-page "pinned" ads follow

readers down the page as they scroll, staying in view to the end of each story. PPN sponsored white papers and webinars featured in our Power Spotlight section are listed in a "pinned" sidebar as well, giving our sponsors maximum exposure and value. PPN also offers a variety of exclusive premium ad formats, including welcome/ interstitial, wallpaper ads, expandable rich media and more. Contact our sales team today for rates and specs.

Today's Top Stories

Robust USB Type C Integrated Power Splitter/Switch in WLSCP

Silergy Technology Inc. today announced the introduction of the S12180010C – a very robust single-input, dual-output power splitter designed for mid- and high-end smartphones and tablet PCs. Any IC product designed for consumer electronics and operating in the vicinity of edge connectors must be tested at electrical surges and stress caused by an incorrect application of power adapters. In these applications, system-level over-voltage protection (OVP) has become a mandated requirement.

90-528VAC Input for Three-phase Four-wire System

Largest Energy Storage Rollout in Canada

Powell Energy Corporation is partnering with Heene Energy to build, deliver, and install projects with a total capacity of 22.8MWh/32.8MVAh at two sites in Ontario, Canada. Powell's modular Stack140 – powered by three exclusive top-OS battery management software – will be the building block for each storage system.

650W Quarter Brick Delivers 1079W in Burst Mode

650W Quarter Brick Delivers 1079W in Burst Mode

Ericesse Power Modules today announced that its award-winning M4011E third-generation 0.5 quarter-brick advanced bus converter has been upgraded to integrate burst-mode operation, which enables the module to handle 1079W of peak power for a brief period of time, up to a maximum of one second.

Featured

Power Spotlight (updated June 20, 2017)

"Wireless Charging: Advanced Technology Delivers Consumer Convenience"

An integrated approach delivers real technical benefits in resonant solutions. Wireless is not new; data became wireless some time ago. However, for all the mobility we enjoy these days, we still tether our mobile devices to the wall at the end of the day to recharge them. Slowly but surely a revolution is happening: consumers are demanding the ability to charge wirelessly and technology enablers are responding. In this white paper, Infineon will review the current state-of-the-art, including the standards that drive this new sector. The paper compares technical approaches and technologies and explains the benefits of a totally integrated approach to delivering advanced wireless charging solutions.

650W Quarter Brick Delivers 1079W in Burst Mode

Ericesse Power Modules today announced that its award-winning M4011E third-generation 0.5 quarter-brick advanced bus converter has been upgraded to integrate burst-mode operation, which enables the module to handle 1079W of peak power for a brief period of time, up to a maximum of one second.

Common-Mode Choke for Automotive Ethernet

TDK Corporation presents the ACT12200 common-mode choke – claimed to be the world's smallest of its type for automotive Ethernet applications. Its dimensions are just 5.2 mm x 2.5 mm x 2.2 mm, making it just half the size of the previous ACT12000.

Rate Sheet

Over 50,000 e-Newsletter Subscribers!

Raising brand awareness and remarketing to past visitors can increase the likeliness of a sale further down the road. Display advertising plays a big part in pushing customers down the sales funnel, eventually leading them to purchase your product or service. Our customized advertising management software, coupled with our extensive readership, enables **PowerPulse.Net** to guarantee that your ad will generate at least 100,000 monthly impressions.

All ads on **PowerPulse.Net** are run continuously for an entire calendar month with a guaranteed minimum of 100,000 impressions. Advertisers generally receive more than 100,000 impressions when their ad is run open-ended for an entire month. When the minimum 100,000 impressions level is achieved, your ad remains running, collecting even more value. There is no additional charge for impressions in excess of 100,000 in a given month.
